

Updates  
Sep 22, 2013

Due to a recent "migration" of our web site to a new web system, some of our recent information did not get on the website and the calendar data was really messed up. Corrections have been made and our information is now current to this date and for the upcoming months. Also an announcement has been posted on the Home page informing Springstead groups that work is being done on the geo-thermal system and it may be noisy and cold during the days it's being worked upon.
